

You **must** answer this question. Write your answer in **220-260 words** in an appropriate style on the separate answer sheet.

You recently attended a conference on the integration of technology in education. You have made the notes below:

How can technology enhance the learning experience in schools?

- Online resources and e-learning platforms
- Interactive whiteboards and smart classrooms
- Virtual reality for immersive learning

Some opinions expressed during the conference:

"Technology can't replace traditional teaching methods."

"Not all students have access to the necessary devices and internet."

"Virtual reality is too expensive and not practical for regular use."

Write an essay discussing **two** of the ways technology can enhance education as noted above. **Explain which technological innovation** you believe holds the most potential for improving the learning experience, providing reasons to support your choice. You may incorporate the opinions expressed during the conference, using your own words as much as possible.
